

Checklist for Task 1: Web - Add country to sign-up dropdown

1. UI Verification

- Verify that the dropdown for "Where's your company registered?" is visible on the sign-up page.
- Verify that the dropdown contains the new option "Sweden".
- Verify that the dropdown displays all existing countries (Germany, Austria, Belgium, Czechia, France, Hungary, Italy, etc.).
- Verify that the dropdown is clickable and opens the list of countries when clicked.
- Verify that the dropdown allows the user to type and filter the list of countries.
- Verify that the dropdown displays "Sweden" when the user types "Sweden" in the search field.
- Verify that the dropdown closes after selecting a country.
- Verify that the selected country is displayed in the dropdown after selection.

2. Functional Verification

- Verify that the user can select "Sweden" from the dropdown.
- Verify that the selected country ("Sweden") is correctly saved when the user proceeds to the next step.
- Verify that the form submission is successful when "Sweden" is selected as the country.
- Verify that the form does not allow submission if no country is selected.
- Verify that the dropdown does not allow invalid or non-existent countries to be selected.

3. Validation and Error Handling

- Verify that the dropdown shows an error message if the user tries to submit the form without selecting a country.
- Verify that the dropdown does not allow the user to type invalid characters (e.g., special characters, numbers).
- Verify that the dropdown does not allow the user to select a country that is not in the list.
- Verify that the **work email field displays an error message if left empty**.
- Verify that the **password field displays an error message if it does not meet the criteria (min 8 characters, at least 1 letter, and 1 number)**.
- Verify that the **terms and conditions checkbox must be checked** to proceed, and an error message is displayed if not checked.

- Verify that the **first name and last name fields display error messages if left empty.**

4. Cross-Browser and Cross-Device Compatibility

- Verify that the dropdown works correctly on different browsers (Chrome, Firefox, Safari, Edge).

5. Performance and Usability

- Verify that the dropdown loads quickly and does not cause any delay in the form submission process.
- Verify that the dropdown is easy to use and intuitive for the user.
- Verify that the dropdown does not cause any performance issues on the page.

6. Edge Cases

- Verify that the dropdown handles the case where the user types a country name that is not in the list (e.g., "XYZ").
- Verify that the dropdown handles the case where the user types a partial match (e.g., "Swe" for "Sweden").
- Verify that the dropdown handles the case where the user tries to paste a country name into the field.
- Verify that the dropdown handles the case where the user tries to select a country while the dropdown is still loading.
